

METHOD 207-1

SAMPLING METHOD FOR ISOCYANATES

EPA's Office of Air Quality Planning and Standards (OAQPS) developed Method 207.1 for the collection of isocyanate compounds from emissions associated with certain manufacturing processes. Go to <http://www.epa.gov/ttnemc01/tmethods.html> for a copy of Method 207-1, based on its current category (e.g., conditional, proposed, or promulgated).
